

8th Conference

Bubble & Drop

24-28 June 2019

Sofia, BULGARIA

Invitation

The organizers warmly invite chemists, physicists, biologists and engineers to take part in this interdisciplinary forum, where fundamental science and applied research will target the front-line topics focused on bubbles, drops, interfaces, foams, emulsions and suspensions.

The B&D 2019 Conference will provide a wide opportunity for exchange of new ideas in the areas of: adsorption and wetting phenomena; surface forces, superhydrophobicity, patches and layering; nano-, microscale stability and sustainability; engineered interfaces and smart nanostructured materials; formulations and innovations for industrial applications.

We look forward to seeing you in Sofia during the B&D 2019 Conference.
